Fiducial Quote Fetcher — Project Documentation Pack

Document set: FQF-DOCS-001 · Version 1.0 · Draft for review · 26 October 2026 **Product owner/requester:** Nitinthilak L (as provided) **Technical assignee:** Harshit Sharma **Product:** Fiducial Quote Fetcher — Insurance Member Details Fetcher Tool

Purpose

This pack is based primarily on the supplied nine-page PRD, plus the task list supplied in conversation. It defines product scope, design, implementation contracts, security, tests, release, support, and handover.

Important: These documents describe requirements and proposed design. They do not prove implementation status, insurer portal permission, adapter feasibility, or successful test results. Existing repository contracts and verified behavior must be inspected before implementation changes.

Document index

1. `01_PRD.md` — Product Requirements Document
2. `02_SRS.md` — Software Requirements Specification
3. `03_TECHNICAL_DESIGN.md` — Technical design and architecture
4. `04_ADAPTER_SDK_AND_INSURER_MATRIX.md` — Adapter contract and eight-insurer plan
5. `05_DATA_MODEL_AND_STORAGE.md` — Local data model, migrations, retention
6. `06_SECURITY_PRIVACY_COMPLIANCE.md` — Threat model and security controls
7. `07_UI_UX_AND_WORKFLOWS.md` — Screen and interaction specification
8. `08_PDF_REPORT_SPEC.md` — Comparison PDF specification
9. `09_TEST_PLAN_AND_REGRESSION_PACK.md` — Test strategy and test cases
10. `10_RELEASE_AND_BUILD_RUNBOOK.md` — Windows/macOS packaging and release
11. `11_USER_GUIDE.md` — Advisor instructions
12. `12_INSTALLATION_HANDOVER_UAT.md` — Installation, walkthrough, acceptance
13. `13_OPERATIONS_AND_TROUBLESHOOTING.md` — Support runbook
14. `14_RISKS_ASSUMPTIONS_ISSUES_DECISIONS.md` — RAID register and decisions
15. `15_DELIVERY_PLAN_AND_DEFINITION_OF_DONE.md` — Milestones, freeze, DoD
16. `16_IPC_ERROR_AND_EVENT_CONTRACTS.md` — Electron IPC and error envelopes
17. `17_REQUIREMENTS_TRACEABILITY.md` — Requirement-to-test mapping
18. `18_GLOSSARY_AND_OPEN_QUESTIONS.md` — Terms and decisions needed
19. `19_CHANGELOG_AND_APPROVALS.md` — Document change and approval record

Status conventions

- **MUST / P0:** required for v1 acceptance.
- **SHOULD / P1:** expected unless explicitly deferred/accepted.
- **MAY / P2:** optional or later.
- **Proposed:** design recommendation, not confirmed repository fact.
- **Pending confirmation:** decision required from product/client/security owner.

Source baseline

The supplied PRD describes a Windows/macOS desktop app, one-time customer/member entry, up to eight insurer workflows, human-assisted authentication, manual fallbacks, branded comparison PDF, local history, signed installers, and UAT release gates. Confirm the latest approved PRD is the source of truth before changing scope.
