Change control

- Product owner approves scope changes.
- Security-impacting changes require security review.
- Changes to adapter contract require fixture and regression updates.
- Changes to PDF fields/disclaimer require business approval.
- Every approved change should update PRD/SRS, traceability, tests and release notes as applicable.

Approval note

This pack is a requirements/design baseline. It does not certify that implementation, portal permissions, security controls, or release criteria have already been verified.
